

Kleissler P C, LLC

Tray Dumping Dust Containment

- Provides simultaneous dust control at two different dust generating points
- Support rods are designed to position tray correctly for proper dust control when removing paper cover
- Effective dust control provided for dumping operation
- Stainless steel construction; polished inside and out

Tray Dumping Hood

- Special Design rotatable tray holder cage
- Removal and discarding of paper is done inside the cabinet under controlled conditions
- Circular dust hood at the bottom of the hopper provides control when the seal between the drum and hopper is broken
- Ergonomic tray is emptied by turning the handle outside the unit
- Auxiliary back-draft hood for manual delumping is an integral part of the unit when the delumping option is chosen
- Lexan site window provides a safe view of the operation
